

Equine Performance Programs

As part of Equine Health Solutions' commitment to total health care for your horse, we have developed three lameness prevention programs to help your horse stay at its athletic best. To reduce the chance of severe lameness issues, the horse should have the best bio-mechanics its conformation allows. The function of the horse's bio-mechanics are affected by the conformation of the hoof capsule, musculoskeletal alignment, subluxation or "stuck" joint motion and inflammation or low grade discomfort in the joints or soft tissue. A thorough nose to tail musculoskeletal evaluation, hoof evaluation and chiropractic evaluation can identify minor issues before they become major problems.

The specific services and tests your horse will receive are detailed inside. By enrolling, you will receive:

- Enjoyment of a worry-free healthcare plan. No phone calls or appointments to make.
- Notification from EHS when it's time for your preventive care appointment.
- Significant savings by pre-paying for medical services.

To enroll, or for more information, please call Equine Health Solutions at

816-322-8040

Equine Health Solutions offers routine and advance services for the equine companion and equine athlete. The services include:

- In-depth lameness evaluations
- Reproductive services
- Dental services
- Diagnostic Ultrasound
- Internal medicine
- Surgery
- In-house Blood Analysis
- Equine Field Services
- Portable Radiology
- Chiropractic care

Equine Performance Programs

Equine Health Solutions

“Keep your athlete in top performance”

Performance Horse Care Plan Silver Level

The **Silver Level Plan** is designed to provide bone, joint, muscle, and teeth evaluation to correct any small problems and help prevent them from becoming larger problems. Hoof conformation is visually analyzed along with radiographs (x-rays) to evaluate the lower limb biomechanics to optimize the athletic function of your horse. Chiropractic evaluation and adjustments will allow more unrestricted movement and coordination.

- Musculoskeletal evaluation
- Chiropractic evaluation & adjustment(x2)
- Dental evaluation and routine float
- Radiographic evaluation of each hoof
- Shoeing Prescription

Value: \$695.71
Your cost: \$626.00*
Savings: 10% - \$69.71

Performance Horse Care Plan Gold Level

The **Gold Level Plan** is designed to identify and maintain an athletic horse's teeth and bone alignment, muscle and joint function. The bones and joints are evaluated for misalignments and decreased motion. The teeth, a major cause of riding behavioral problems, and influence balance or coordination, are evaluated and corrected as needed. The hoof conformation, a chief component of athletic performance, is evaluated and modified if needed. Chiropractic adjustments are provided to keep motion in the spine and extremities for maximum performance.

- Musculoskeletal evaluation (x2)
- Chiropractic evaluation & adjustment(x4)
- Dental evaluation and routine float
- Radiographic evaluation of each hoof (x2)
- Shoeing prescription (x2)

Value: \$1246.71
Your cost: \$1060.00*
Savings: 15% - \$186.71

***Note:** Payment is due upon enrollment in a Performance Horse Care Plan and is non-transferable and non-refundable. Trip charges, office calls, tranquilizers, or any additional diagnostic procedures or treatments other than those listed will be billed in addition to the plans. The plans are to be completed within a 12 month period.

Add 3% to cost, if paid with a credit card.

Performance Horse Care Plan Platinum Level

The goal of the **Platinum Level Plan** is to keep the athletic horse in its top working form. By evaluating the teeth, bones, joints, muscle, and hooves, minor issues can be identified and corrected allowing top athletic performance to be maintained. Along with preserving the optimum bio-mechanical function of the hooves with multiple radiographic hoof evaluations, this plan includes monthly chiropractic adjustments to enable the equine the best biomechanical function possible. This plan keeps joint and nerve function at its optimum to ensure your horses maximum performance, balance and coordination. With this plan, if any joint injections are needed, a 20% savings will occur on any joint injections and related joint injected medications.

- Musculoskeletal evaluation (x2)
- Chiropractic evaluation & adjustment (x12)
- Dental evaluation and routine float
- Radiographic evaluation of each hoof (x2)
- Shoeing prescription (x2)

Value: \$2006.71
Your cost: \$1705.00*
Savings: 15% - \$301.71

Additional savings: 20% on joint injections and related joint injected medications.
